**Dimensions are of stove only including frame further space should be allocate for collars, pipework etc.

**All dimensions are correct at time of print

A Henley stove with this icon features a tertiary air system. This creates a cleanburn system where hot air is pushed into the firebox above the normal height of the fire. This allows the excess gasses to combust given a cleaner burn.

European standard of test for stoves fired by solid fuel, Incorporating corrigenda September 2003, June 2006 and August 2007

A Henley stove with this icon means that the stove is fully compliant with regulations for fully passive houses.

A Henley stove with this icon has an external air facility allowing the air to come directly from outside your building rather than through a vent in the room. This is required for heat recovery systems in new build projects.

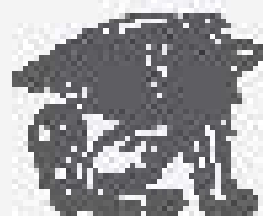

All Henley stoves come with a 5 year warranty on the body of the stove.

*** All stove measurements, stove drawings and boiler pipe drawings can be found on www.henleystoves.com
 *** All information is correct at time of print however for more up to date information visit www.henleystoves.com
 *** Picture are for illustration purposes and some designs may have changed before going to print
